

EMMANUEL OJETUNDE

Halifax, NS | (506) 607-4304 | Em919177@dal.ca | portfolio.emmanueloje.online | github.com/Emmanuel27121

TECHNICAL SUMMARY

3rd-year Computer Science student at Dalhousie University with hands-on experience building full-stack web applications, UI/UX prototyping in Figma, and backend APIs. Proficient in JavaScript, React, Flutter, Node.js, Python, and SQL, with a strong creative and analytical mindset. Eager to contribute technical skills, automated solutions, and collaborative problem-solving to innovative software engineering teams.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript, TypeScript, Python, Dart, Java, C, SQL, HTML5/CSS

Web & Mobile: React, Next.js, Flutter, Tailwind CSS, REST APIs, Responsive Web Design

Backend & Data: Node.js, Express, PostgreSQL, SQLite, Prisma ORM, Python Data Pipelines

Design & Tools: Figma (UI/UX Design), Git, GitHub, Agile Methodologies, VS Code, Windows Environment

FEATURED PROJECTS

Personal Portfolio Website

React, JavaScript, Tailwind CSS

- Designed user interfaces and wireframes in Figma to map out application layouts and user flows before implementation.
- Designed and built a responsive personal portfolio showcasing technical projects, interactive components, and professional profile.

Task Management REST API

Node.js, Express, SQLite, OpenAPI/Swagger

- Engineered a scalable RESTful CRUD backend API utilizing relational structures and modular route controllers for structured data persistence.

Weather Web Application

JavaScript, HTML/CSS, REST APIs

- Developed a responsive web interface integrating external REST APIs to parse JSON payloads and display real-time weather metrics with clean layouts.

Flashcard Generator

Python, Data Processing Pipelines, Text Parsing

- Developed a Python data processing utility that extracts unstructured text from documents and transforms it into structured study material.

EDUCATION

Dalhousie University

Halifax, NS

Bachelor of Computer Science (3rd Year)

2024 – Present

Relevant Coursework: Software Development, SQL & Database Systems, Web Programming, Data Analysis

EXPERIENCE

Data Analyst Co-op

Saint John, NB

Saint Malachy's High School

2024

- Supported data organization, verification, and reporting workflows using Excel and introductory SQL to streamline internal tracking and system record-keeping.
- Applied structured analytical skills to troubleshoot data discrepancies and maintain high data integrity.

Media & Technical Systems Specialist (Volunteer)

Saint John, NB

RCCG Pavilion of Redemption

2020 – Present

- Operated, maintained, and troubleshooted hardware, audio, and visual systems during live events under strict operational time constraints.
- Collaborated with team members to diagnose technical issues and ensure reliable system performance.
